

D8™

Programmable dispenser with 8 pumps

Impressive dispensing accuracy.

The Blendtec D8 is the leader in creating perfectly-measured recipes. With 8 peristaltic pumps, it can consistently dispense up to 64 different combinations of product for any application. No more guesswork or wasted product! Employees simply enter the code, and the D8 does the rest.

The perfect answer for flawless dispensing.

The Blendtec D8™ delivers exact product amounts directly into the jar (or other container) with precision and speed. Now your employees can make custom drink recipes, add ingredients to a mix, or pour precise toppings simply, easily and with incredible accuracy every time. The D8 will dispense up to eight different shelf stable, bag-in-the-box products at a time.

Standard Features

DISPENSE

- 8 peristaltic pumps for any type of syrup, juice, sauce or alcohol, plus cold water
- Provides exact portion control which saves money and controls waste from over-pouring

CONTROLS

- Easy-to-use product selection and one-touch operation
- USB port for easy programming changes and recipe updates
- Blue LCD display

CUSTOMIZE

- Create up to 64 different menu options in multiple sizes
- Large, flat surface available for custom graphics

Push-button simple.

Learning to use the D8 is a breeze – even the most inexperienced employees can learn to use the D8 to dispense product proportions perfectly from the very first try.

Portion control at your fingertips.

Designed for high volume applications, the D8 will save you time and money, and increase the capacity and consistency of your foodservice operations – all while reducing waste!
