

## WildSide™ Jar

The jar that revolutionized blending

## No jar does it better.

In the food service industry, speed is everything. So in 2001 we designed our exclusive patented WildSide Jar with a unique fifth side that shifts the blending vortex and produces a powerful cyclonic action. The result: dramatically improved blending performance and larger-volume blending.

# More consistent blends, no matter the volume.

The WildSide™ Jar's extra-wide base, along with an aggressive, nearly 4-inch patented wing-tip blade, lets your employees make thicker blends even faster than ever – without the time-consuming use of a messy tamper or plunger.

## Standard Features

### VORTEX

- Patented 5-sided jar produces a better blending vortex – saving time and product.

### ERGONOMIC

- Lightweight material for easy lifting and pouring
- 3 corners for simple pouring at multiple angles
- Easy-to-read jar markings up to 36 ounces

### SAFE & STRONG

- Made from durable, long-lasting Eastman Tritan™ copolyester
- BPA-free
- Non-sharp blade makes cleaning safe and simple

### CUSTOMIZE

- Custom jar graphics available

FourSide™ vortex

WildSide vortex

# Every detail...created with your business in mind.

WildSide Jars are stackable and feature easy-to-read markings. The ergonomic lightweight design allows for easy 3-way pouring. And with a larger capacity, you can create more servings with each blend – saving time and product.
